EXPERIENCES

Thalmic Labs

Feb 2015 – Present

Machine Learning Software Engineer – Kitchener, Canada

One of a small team of contributors developing a multipurpose evaluation framework for machine learning models in Python. Performed in-depth literary reviews and implementations of features and filtering methods for time series signals. Reviewed code and made small design changes to models developed in C.

Thalmic Labs

Sept 2014 – Feb 2015

Data Specialist – Kitchener, Canada

Developed data pipeline in Python, and acted as project manager between Software, Firmware, Hardware, and Machine Learning teams. Designed protocols, lead and trained a team of data collectors, and scheduled large data collection initiative for the Myo Armband.

Kiwi Wearable Technologies

July 2014 – Nov. 2014

Machine Learning Contractor – Toronto, Canada

Performed feature selection process for wrist mounted IMU devices. Investigated and performed survey of machine learning models using libraries for rapid prototyping. Delivered models and evaluation methods in Python, and summarized results and conclusions in a technical paper.

Morgan Solar

Sep 2012 – Dec 2012

R&D Engineering Intern – Toronto, Canada

Designed and developed an automation tool using LabVIEW for calibration of tracker-mounted solar panels using electrical, software, and mechanical components. Utilized optimization techniques with a feedback system to find optimal power. Sculpted various Python scripts to automate daily data collection and database population.

Achievers

May 2011 – Aug 2011

Software Developer – Toronto, Canada

Aided in the optimizing of numerous SQL database queries for product newsfeed with behavior similar to Facebook's. One of two lead developers on program upgrades from Java based platform to a PHP platform as well as being responsible for the development and maintenance of a user Dashboard.

SKILLS & TOOLS

Skills

Software Development, Machine Learning, Signal Processing, Optimization, Constraint Programming, Statistics, Data Analysis, Databases, Agile practices

Tools

Python, Pandas, Git, MATLAB, SQL, MongoDB; as well as familiarity in C/C++, and LabVIEW

Languages

English, French (currently A1), extremely interested in learning new languages

Courses

Machine Intelligence, Pattern Recognition, Data Structures & Algorithms, Optimization, Design Optimization under Probabilistic Uncertainty, Probability & Statistics

EDUCATION

University of Waterloo

2009 – 2014

B.A.Sc. Honours Systems Design Engineering – Waterloo, Canada

Centering on finding holistic, interdisciplinary approaches to solving complex problems with a focus towards product development, and software design.

PROJECTS & AFFILIATIONS

Machine Learning

Oct. 2015 – Jan. 2016

Neural Networks for Machine Learning

A course taught by Geoffrey Hinton that teaches concepts such as recurrent neural networks, unsupervised pre-training using Restricted Boltzmann Machines, modeling hierarchical structure, and recent applications of deep neural networks.

Machine Learning

Jan. 2014 – April 2014

NCAA March Madness Tournament Prediction

A feedforward artificial neural network trained using back-propagation, used to simulate and predict the results of the NCAA basketball tournament. Implemented in Python, the network predicted all match-ups, and estimated probabilities of each outcome.

Optimization

Jan. 2014 – April 2014

Betting Strategies for NCAA March Madness Brackets

Probabilistic optimization was used to maximize return on investment for betting, by means of probabilities derived in the above model. This was accomplished by extending methods from Mean-Variance Modern Portfolio Theory, and Dynamic Programming.

Divie

Jan 2013 – Apr 2013

Lead Back-End Developer and Project Coordinator – Waterloo, Canada

A team design project creating a web application for optimizing fair and equitable division of assets in the event of post-mortem estate division. Responsible for PostgreSQL database development, query optimizations, and project management.

UW Bike Centre

Jan 2013 – Jan 2015

Bike Mechanic – Waterloo, Canada

Volunteering to do what I enjoy, fixing bikes or giving advice to those that need it.

OTHER EXPERIENCES

Deloitte

May 2013 – Aug 2013

Business Technology Analyst – Vancouver, Canada

OpenText

Sept. 2010 – Dec. 2010

Technical Writer – Waterloo, Canada

General Dynamics

Jan. 2010 – April 2010

Systems Design Engineer – Ottawa, Canada

INTERESTS

Great Outdoors

Hiking, Rock Climbing, Road Cycling, Canoeing, Surfing, Traveling on a Shoestring

Engineering

Industrial Design, Alternative Energy, Bicycle Project Builds
